How Students Create a NSPES account

Student accounts are being moved from student.ednet.ns.ca to nspes.ca. This is to provide greater privacy to students and help protect their personal information.
The student NSPES account is needed for student email, ourcloud and soon for the NSPES Moodle.

To generate an account students must work through the form at

https://selfservice.nspes.ca/cgi-bin/account.pl

They will need their student number (obtainable in Powerschool).
This will then give them their NSPES username.

Teachers of younger grades may wish to create the accounts for student if they are required.

Transfering information from the student.ednet account

If a student is currently using their student.ednet email account and they wish to transfer the contents to their NSPES account, they should use this site.
https://selfservice.nspes.ca/cgi-bin/migrate.pl
